

Dedicated To
Being the Best !

Join us
today!

Humankind faces significant challenges related to resource demands and constraints, and extreme weather events that impact the resiliency and sustainability of our communities. Clean Globe Consultancy (CGC) is committed to integrating the principles of sustainability into our work in planning, designing, and managing both property and infrastructure.

**Every seed
counts!**

About US

Founded by a group of experts, with decades of cumulative experience between them, Clean Globe is a differentiator, providing unique solutions to client's needs. all under one umbrella. Our service offering is diverse yet synergic and we aim to bring holistic climate solutions to client's problems rather than working it in silos.

Our business strategy is based on five verticals, carefully curated to suit the market needs of where we operate. Our engagement and expertise with the wider international markets further accentuated our understanding of interconnectedness of services and helped identify the need for providing comprehensive solutions

Mission

As an advisory company, our business model is to provide expert and innovative solutions to clients using our multi experienced team, starting from strategy setting to implementation. Our mission is to become a centralized knowledge hub, experienced in delivering specialist climate solutions to clients around the globe

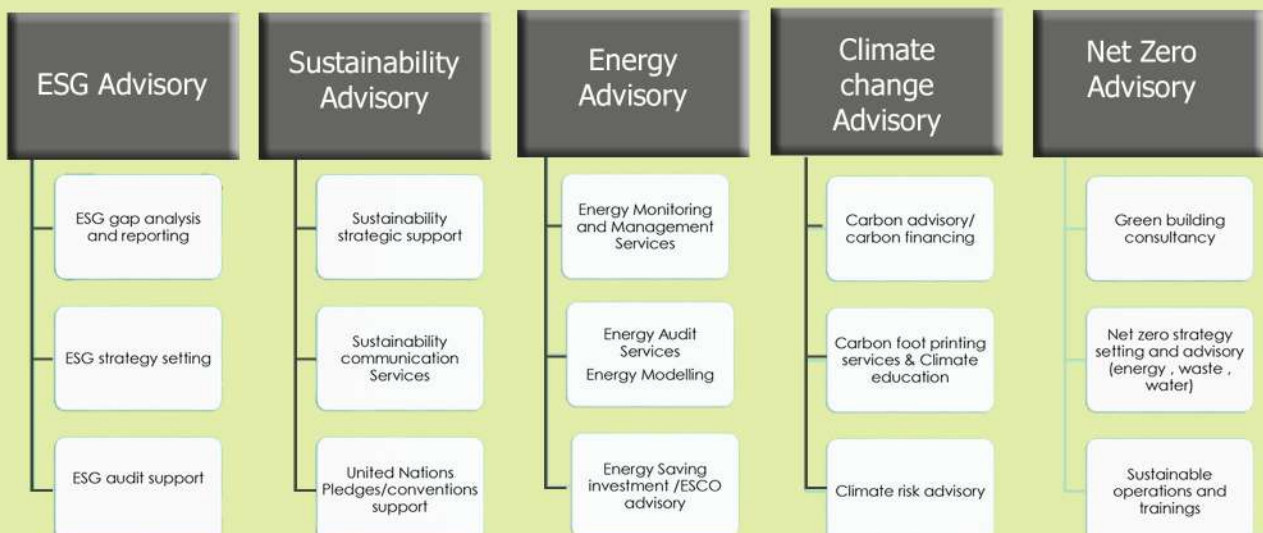

Vision

At Clean Globe our vision is to enable businesses, government and communities achieve their climate target today, for a better tomorrow.

ENVIRONMENTAL
PROTECTION
